Marseilles master:
Astrophysics lectures through e-learning

Patrice Theulé

PIIM, UMR7345 du CNRS, Physique des Intreactions Ioniques et Moléculaires,
campus Saint-Jérôme, 13397, Marseille Cedex – France

I will present the new SPaCE (Space Physics and ChEmistry) master program [1] at the Aix-Marseille University. This program started in 2015 and it is supported by the AMIDEX initiative. The program is organized in two years (M1 and M2) and taught in English. The students are located both at the LAM (Laboratoire d'Astrophysique de Marseille) and at PIIM (Physique des Interactions Ioniques et Moléculaires). They share their time half on e-lectures in two equipped classrooms and projects both LAM and PPIM. I will share the feedbacks on the two first years.
